DETAILED ACTION

Specification/Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because pages 2, 4 and 12 contain flow charts which must be presented as formal drawings (37 CFR 1.58). The specification must also be amended to incorporate a corresponding description of said drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1623

3. Claims 2-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,838,560. Although the conflicting claims are not identical, they are not patentably distinct.

The examined claims are either anticipated by, or would have been obvious over, the reference claim(s). Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are generic to all that is recited in claims 1-4 of US 6,838,560. That is, claims 1-4 of US 6,838,560 fall entirely within the scope of claims 2-19 or, in other words, claims 2-19 are anticipated by claims 1-4 of US 6,838,560.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gregory et al. *Archives of Biochemistry and Biophysics* (1979), Vol. 196, pages 199-208 (Gregory) proposes a structure for a dialdehyde-ATP-lysine derivative as shown in Fig. 3a. The prior art does not teach or suggest the replacement of the two -OH moieties with hydrogen atoms nor replacement of the lysine moiety with a label, protein, enzyme, fatty acid or peptide as instantly claimed.

5. Claims 2-19 are pending. Claims 2-19 are rejected. No claims are allowed.
